# ALEX BEZUSKA

I am a web designer, developer, and indie game illustrator with a passion for when art and technology work together for a purpose. A transplant to Louisville from Orange County, CA, I have discovered the extraordinary beauty of all four seasons and life without a great deal of traffic.

I believe that web design is much more than a coat of paint. Design and user experience must create a seamless flow from the creator to the user in order to clearly convey the website's message. I am excited about working in an environment that understands the importance and advantages of technology and encourages their team to learn and experiment with new web practices.
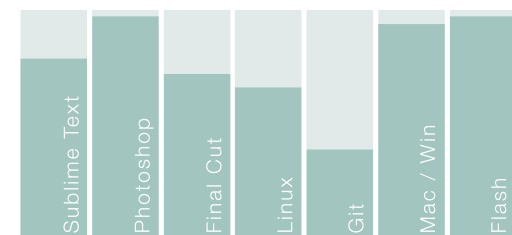

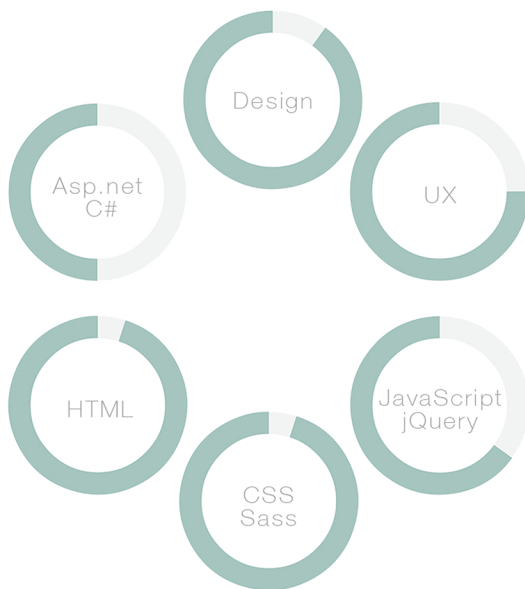

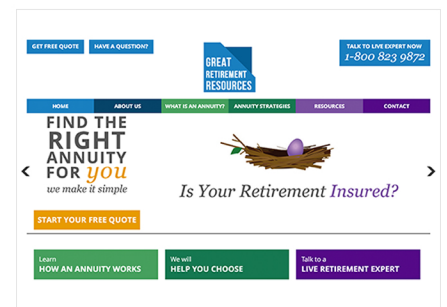

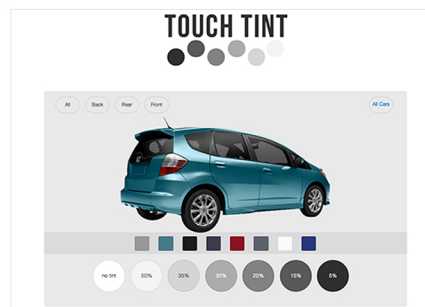

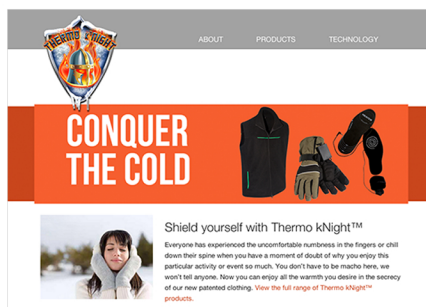

WORK EXPERIENCE

FRONT END WEB DEVELOPER | MORTENSON DENTAL PARTNERS
April 2013 - Present
I design and develop internal use web apps and internal/external websites. I specialize in the design and UI/UX of each project, but also apply my experience with C#, SQL server, mySQL, and MongoDB to bridge the gap between my team's server-side code and my front end work.

INDEPENDENT WEB DESIGNER | ALEXBEZUSKA.COM
January 2008 - April 2013
Worked one-on-one with clients to bring their vision and purpose to life on each custom website. To do this I worked to balance the end user's needs and the client's requests.

PERSONAL EXPERIENCE

FOUNDER/ORGANIZER/HOST | JSLOU (JSLOU.ORG)
August 2013 - Present
In order to grow and challenge myself as a developer I have started and sustained JSLou, a local group focused on all things JavaScript. I have learned a great deal from the many experienced developers I have met through JSLou. I enjoy facilitating an environment where others can learn and expand their skills.

CREATOR/DESIGNER/ARTIST | TWO SCOOP GAMES (TWOSCOOPGAMES.COM)
November 2013 - Present
To keep my skills current and to sustain my passion for design and programming, a friend and I develop HTML5/JavaScript games. We have currently completed three projects, all of which are cross-platform. In doing this I am able to combine my passions for art and technology to create games for all to enjoy.
